Viktoriia *Volkova*

viktoriiavolkova18@gmail.com
Kraków, Poland
Open to product design and AI design evaluation roles

Product designer for apps, brands and characters, and the motion between them. I design end to end, and write C++ (Qt) and TypeScript, so I design with the build in mind.

Experience

2026 — **Software engineer intern, backend** · KSI UJ
Queue and live feed for an online judge for competitive programming. TypeScript, Node.js.

2026 — **AI reasoning evaluator** · Mercor
Checked Grok's solutions to 100+ hard maths problems and wrote hints that led it to correct ones.

2024 – now — **Promotion ambassador and designer** · KSI UJ
Posters, social graphics and tee prints for the CS students' association; two tee designs printed.

2024 – 2026 — **C++ (Qt) software engineer** · CHM software
Moved POS and self-checkout screens from QWidget to QML; load time fell from 2.3 s to 1.1 s.

2023 — **Product and economy UX/UI designer** · Chit Chat AI
Led the design cycle of a web app with AI characters: research, flows, UI, prototypes, and the probability model and currency balance of its gacha economy.

Education and awards

2026 – now — **MSc, Computational Mathematics** · Jagiellonian University

2023 – 2026 — **BSc, Computational Mathematics** · Jagiellonian University

2025 — **Bronze medal, team captain** · ISTCiM international maths competition

2023 — **Prize, Fine Art** · Nezalezhne Slovo, for the triptych *World*

Selected work

Chit Chat 210°
AI companion web app: chat, character library, gacha and gem economy.

eMeditation 120°
iOS meditation app concept with 4-7-8 breathing; Swift prototype.

Triptych *World* 030°
Digital collage series; shown at PRAY4UKRAINE.

Việt Home 330°
Eight-page menu for a Vietnamese restaurant and bar, Polish and Vietnamese.

KSI 0%
Posters and merch for the CS students' association at UJ.

Skills

Product design · UX research · UI and design systems · Prototyping · Motion · Illustration · Branding and print · Game economy

Tools

Figma · Procreate · Swift · C++ / Qt, QML · TypeScript, Node.js
